

KM MUBIN Data Science Student kmmubin1234@gmail.com +8801322739367 Dhaka, Bangladesh linkedin.com/in/kmmubin github.com/itzmubzy			
CAREER OBJECTIVES Data Science student skilled in Python, statistics, and problem-solving, seeking an internship in Data Science, AI, or Information Systems. Interested in data analysis, EDA, and insight generation. A hardworking, quick learner with leadership potential.			
EDUCATION Bachelor of Science in Data Science CGPA: 3.84 01/01/2028			
SKILLS Programming Languages Python, R (Basic), SQL, C++, Java, C# Core Competencies - Data Analysis & Exploratory Data Analysis (EDA) - Basic Machine Learning - Basic Docker (containerization for ML applications) - Statistical Analysis - Data Visualization - Data Cleaning & Preprocessing Communication and Collaboration - Strong written and verbal communication skills for presenting technical results clearly - Ability to explain technical concepts to both technical and non-technical audiences - Experience working collaboratively in team environments and group projects Data Science & Libraries Pandas, NumPy, Matplotlib, Scikit-learn, Seaborn Tools & Technologies Jupyter Notebook, Microsoft Excel, Power BI, Git, Visual Studio Code, Google Colab, Kaggle			
PROJECTS Business Insights Analysis for Clothing Company (Spotlight Attires) 03/2026 – Present - Description: Real-world project analyzing company data to generate business insights and support decision-making. - Skills Used: Python, Pandas, Data Analysis, EDA, Data Visualization, Business Analytics Air Pollution Awareness and Protective Behavior Analysis 02/2026 – Present - Description: Research project analyzing the relationship between knowledge, attitude, and protective behavior regarding air pollution using a KAP survey dataset. - Skills Used: Python, Pandas, NumPy, Statsmodels, Data Analysis, Statistical Modeling, Data Visualization Climate Impact Analysis on AUS Rice Yield in Bangladesh 12/2025 – Present - Description: Conducting a research-based data science project analyzing the impact of climate variability on AUS rice yield in Bangladesh using long-term data (1969-2023). Integrates econometric modeling and machine learning techniques to understand climate-yield relationships. - Key Contributions: Data collection and integration, preprocessing and detrending, econometric modeling, Random Forest development, performance improvement using satellite data, and feature importance analysis. - Skills Used: Python, Pandas, NumPy, Scikit-learn, Data Analysis, Machine Learning, Statistical Modeling			
ACTIVITIES & LEADERSHIP AIIESEC in Bangladesh, Exchange Participant Manager 03/2026 – Present - Recently joined the Outgoing Global Exchange team - Engaging in participant management and communication processes AgeSense Initiative, Sub Executive (Marketing & Design) 04/2025 – Present - Designed promotional content and marketing materials - Contributed to branding and social media strategies - Collaborated on outreach campaigns AIUB Computer Club, General Member 01/2025 – Present - Volunteered in organizing AIUB Cyber Gaming Fest (national-level event) - Assisted in event coordination, participant management, and operations - Worked collaboratively to ensure smooth event execution AIUB Community of Engineering Students (ACES), General Member 2025 – Present - Participated in engineering events and workshops - Collaborated on academic and extracurricular activities - Engaged in peer learning and networking ESAB AIUB Unit Face, General Member 2025 – Present - Participated in environmental and sustainability initiatives - Contributed to awareness campaigns and community activities - Engaged in teamwork-based projects IEEE AIUB Student Branch, General Member 01/2025 – 01/2026 - Attended technical seminars and workshops - Explored emerging technologies and industry trends - Networked with professionals and students
